Education

B.E.,Computer Science and Engineering   2021 – 2025 | CGPA: 8.4
Chennai Institute Of Technology

Professional Experience

BHARAT INTERN   June 2023-July 2023
Web Development
- Focused on CSS, HTML, JavaScript to create engaging, responsive user interfaces. Created impactful projects specifically emphasizing frontend design, such as a portfolio website and Todotask.
- Translated learned frontend skills into practical, visually appealing web solutions, gaining valuable experience in real-world frontend development.

OYASIS INFOBYTE   June 2024-July 2024
Frontend with reactjs
- A typing speed checker application was developed to measure the user typing skills through real-time performance.Created a Music Player application with dynamic playlist management, intuitive UI, and audio playback controls using ReactJS.
- I have gained experience in integrating component based architecture,also implemented responsive user interfaces, optimized performance. Additionally, I have collaborated on enhancing the functionality of ReactJS applications.

Projects

E commerce website
- Employed React.js in the design of an e-commerce platform, which also implemented Node.js as well as Express.js for server-side programming and MySQL for database management.
- Integrated transaction processing features into the platform including payment gateways and order processing. The interface is responsive and usable on different devices.

SpeedyBasket
- Developed a full-stack Grocery App using Reactjs, Nodejs, and MySQL, facilitating seamless interaction between users, shop owners, and delivery person. It is responsive and user-friendly interface,customer experience across web and mobile platforms.
- Implemented user authentication, product management, order placement, and real-time order tracking functionalities.Streamlined the order placement process with features like cart management and payment gateway integration.

Generative AI
- I developed a responsive system uses generative AI to provide intelligent and contextual answers to user questions it improve conversational communication by providing accurate solution.
- This also provides voice content, which has been used to improve the user experience through simple and intuitive voice interfaces used generative AI to provide answers to user questions

Certificates

Web Development Bootcamp-udemy
Completed a comprehensive web development bootcamp on Udemy, gaining proficiency in front-end and back-end technologies.

Introduction to javascript -coursera
Achieved a certificate for creating javascript which supports the html document.it is created variance ideas to develop a project.

Introduction to Front-end Development with ReactJS
It focuses on building user interfaces using component-based architecture. ReactJS enables developers to create dynamic and efficient web applications.

Introduction to Cybersecurity - Cisco Networking

CCNA1, CCNA2, CCNA3 Modules -Cisco Networking

Skills

Programming Skills	Web development	Database
Python	Html,CSS,JavaScript	My Sql
Java	Reactjs,Nodejs	

Leadership skills

Case Study Team(Event Coordinator)- Hackerz23 National Level Technical Symposium   August 2023- September 2023
